And Munitions

## REDS STEADILY ADVANCE

Poland Forces Make Gains in the  
Grodno Districts

WASHINGTON.—(By United Press)—With Poland reported to be virtually destitute of arms and ammunition, the Russian-Soviet armies, reinforced, now outnumber the Polish forces 3 to 2 in their victorious advance westward, according to official advices Saturday from Warsaw.

This fact was regarded as highly significant by military men here, as previous official estimates have placed the number of Polish troops on the Russian frontier as in excess of the Bolshevik forces, and one of the principal sources of strength of Poland heretofore was held to be her large number of men for fighting.

On the northern and southern Russo-Polish front, the soviet armies now have a total of about 600,000 troops, including both combative and semi-combative, according to these official advices. On the northern front, north of the Pripyat river, the Bolshevik forces are reported to number 360,000 men.

## REDS ADVANCING

On this front, the reds are pushing back the poles in a great fan-like movement southward. On the southern front, or the fighting front south of the Pripyat river, the red armies have a total of 240,000 troops. General Budenny, a sergeant of the old czarist army and who is said to have been directly responsible for the defeat of anti-Bolshevik leader Denikin in south Russia, is credited in military circles here with the present elimination of Poland's sector on the southern front. The Polish troops on the northern and southern fronts total 400,000 troops, according to every information. On the northern front, there are said to be 240,000 Polish troops and on the southern front 160,000. The total number of men under arms in Poland is said to be 815,000 enlisted men and 30,000 officers, while soviet Russia is reported to have from 1,125,000 to 2,600,000.

While the state department Saturday was considering advisability of the United States extending aid to Poland to purchase surplus war supplies of the war department, some military observers feared that delay on the part of the United States and more especially the allies in giving material aid to Poland might result in the elimination of the new-born republic.

## FIGHTING FOR GRODNO

WARSAW.—(By Associated Press)—The Poles and Bolsheviks are fighting for possession of Grodno. In a counter attack the Poles captured two of the Grodno forts and the southern part of the town, which was taken in hand to hand fighting.

A communiqué issued by the war office announced further Polish successes along the Niemen, where the Bolsheviks have been pushed back at several places. The Poles capturing two cannon and some prisoners. The fighting is continuing.

## ALLIES SEEK INFORMATION

PARIS.—(By Associated Press)—The "role of the Franco-British mission now on its way to Warsaw," said Premier Millerand to the senate "is to get an accurate idea of the situation, to support with every means within its power the newly formed Polish ministry, and to advise us as to the army's needs in material, munitions and instructors."

"The mission will do what is possible, even what is impossible, to come to the help of our allies," the premier continued.

"Latterly, we have not spared friendly warnings to Poland, but she now expects from us something besides repreaches. I can assure you her expectations shall not be in vain."

MOSCOW REPLIES

LONDON.—Private cables from Warsaw say there is a strong report that Moscow has replied to Poland's representations for an armistice as follows:

"We have directed our field command to arrange an immediate armistice with Poland."

FIRE LOSS IS \$200,000

ALLIANCE.—A fire loss that will reach close to \$200,000 occurred in Sebring, four miles east of here early Saturday. The blaze originated in a Chinese laundry and spread to the business section. Unable to control the fire the Alliance fire department was called and Chief Heid responded with company No. 1 and at 8:30 o'clock had the fire under control.

EXTRA SESSION IN  
HARDING PLANWould Call Congress Soon After  
Inauguration, Friends say

MARION.—(By United Press)—An extra session of congress will be called promptly after inauguration of the new administration, March 4, next, if Warren G. Harding is elected president, according to the belief of his close advisers here Saturday.

Adoption of a resolution declaring peace with Germany, and repeal of war-time legislation, would be the two essential tasks of such a session, it was stated. Various measures passed by the present Republican congress, but vetoed by President Wilson, might also be brought up for consideration again.

Harding in his speech of acceptance, promised to sign a peace declaration as soon as it can be passed, and this, his friends took to be a virtual announcement of his intention to call a special session if elected. Otherwise no session could be had after Harding's inauguration until December, 1921, over a year after the election.

This plan, however, is believed to be contingent upon a Republican congress being elected. While party workers here believe the house certain to go Republican next November, they have less certainty about the senate, altho they expect to win a Republican majority there by a hard fight. The terms of 32 senators expire next March 4, and their places must be filled at the coming elections. The Republicans now have a margin of two in the senate and even should they lose one seat in November the party would be evenly divided, leaving the deciding vote with the chair, which would be Republican should Harding carry the election.

Republican managers are most concerned over the situation in New York, Indiana, Colorado and Oklahoma. Senator Harding's seat must also be filled and both parties will make a desperate fight for it.

EXTENSION COMPENSATION  
LAW IN OHIO IS URGED

SANDUSKY—Adoption of a resolution urging amendment of the state's workmen's compensation law so as to include all employers of labor regardless of number of employees; election of Joel Kennedy, Cincinnati as president and selection of Cedar Point for the 1921 convention, concluded the annual conference of the Ohio Master House Painters and Decorators' Association at Cedar Point.

The murder of Mrs. Henry Love was one of the most brutal kind. Her body was found in the cellar of their farm house, her throat cut.

Circumstantial evidence was all that could be produced against her husband in the trial, but a verdict of guilty was returned and he paid the penalty on the scaffold.

Arnold Love, 21, an industrious and respected farmer, arose from his chair and confessed to murdering his mother seven years ago, a crime for which his father was hanged on circumstantial evidence.

Love, in slow and hesitating voice, told the story of his struggle of seven years to still the voice of a guilty conscience.

## AIRPLANES USED IN BUSINESS

Office to Home Trips Regularly Made Now

TOURISTS FLY TO WILDS

Supplies Taken to Mountain Mines in Northwest.

NEW YORK.—About 100 business men scattered throughout the United States more or less regularly fly in airplanes between their homes in the country, at the mountains or the shore to their city offices, according to an estimate of the Manufacturers Aircraft Association. The number of itinerant aerial "taxi-drivers" who carry passengers on short but remunerative flights is placed at some 300.

"There is a steadily increasing demand for aircraft of the commercial type," says a report made to the Association, "but, contrary to some published reports, the demand does not equal the supply. Factories now in operation in the United States could construct ten times the number of aircraft which optimists estimate would be required this year."

A trip thruout the country taken by representatives of the Association revealed some interesting uses to which aircraft are being put. "In Seattle during the tourist season, the investigators reported, 'a passenger airplane makes daily runs over and around Mount Rainier, flying at 20,000 feet, some 5,000 feet above the mountain.'

"At the Santa Barbara seaside resort a flying boat is in daily operation over the channel, two of its most interesting passengers during the early part of this year having been the King and Queen of Belgium. Regular flights are being conducted over Southern California with a dozen planes."

"There is considerable agitation for an extension of the aerial forest patrol of California, which has been instrumental in protecting life and property from fire loss. The California Rice Growers' Association, which last year established a service patterned after the forest patrol over 16,000 acres of rice lands, has enlarged this service to guard that acreage."

"Two flying boats are being used for transporting supplies from Seattle to a mining company in British Columbia."

## BEATY KEEPS GUN, SHE'S AFRAID

Wife Says in Divorce Suit—Answer in Clark Case

One cheap dress, which she made herself, was all the clothes her husband bought her in the four years of their married life, according to the petition for divorce filed by Margaret Beaty against George W. Beaty, 327 1/2 S. Main St., in common pleas court late Friday.

For weeks at a time he refused to talk to her, although she tried to make things pleasant for him, she says. After working at the Solar refinery all day, she charges many times he retired without washing up.

On account of the lack of fuel, she charges she was cold many times in winter and was forced to eat only such groceries as he brought home to have cooked for himself.

She says she is afraid of him and bases her fear on the fact, he keeps a gun in the house. They were married April 30, 1915.

Answering the divorce's petition of her husband, filed some weeks ago, Mrs. Fay Clark says she was forced to take in washings to provide groceries for herself and two children. Her husband, Mason, she says took the children and placed them in a home in Lima, promising to pay their board, but Mrs. Clark says he failed and she was compelled to provide for them. She charges he associated with other women.

Clark, in his petition, says she neglected their home and children and left August 9, last, residing on N. Central Ave. The couple were married in Kenton in December, 1910. Their children are Marcella, 3 and Don, 6.

## SHAKEN BY QUAKE

California is Visited by Four More Shocks

REDDING, Calif.—(By United Press).—Four earthquakes shocks shook the Fall river valley, 80 miles northeast of Redding, during the 24 hours ending at 8 a. m. Saturday, according to a telephone message here.

The quakes were sufficiently violent to rattle dishes.

The village is near Mount Lassen and the belief is that the quakes may have been connected with the volcano.

## GYP VAMPING KEPT HIM OUT OF A DOG'S GRAVE!

ATLANTA.—Being a stool-pigeon is a dog's life, but then...

It was a case of life or death with Gyp.

W. L. Lively, Atlanta's sprightly dog catcher, arrested Gyp for not wearing proper dog jewelry. The penalty assessed—after days passed and no one bailed him out—was death.

Gyp took counsel with himself. B'dogged it he'd be bumped off—and he such a business dog, too—b'dogged it he would.

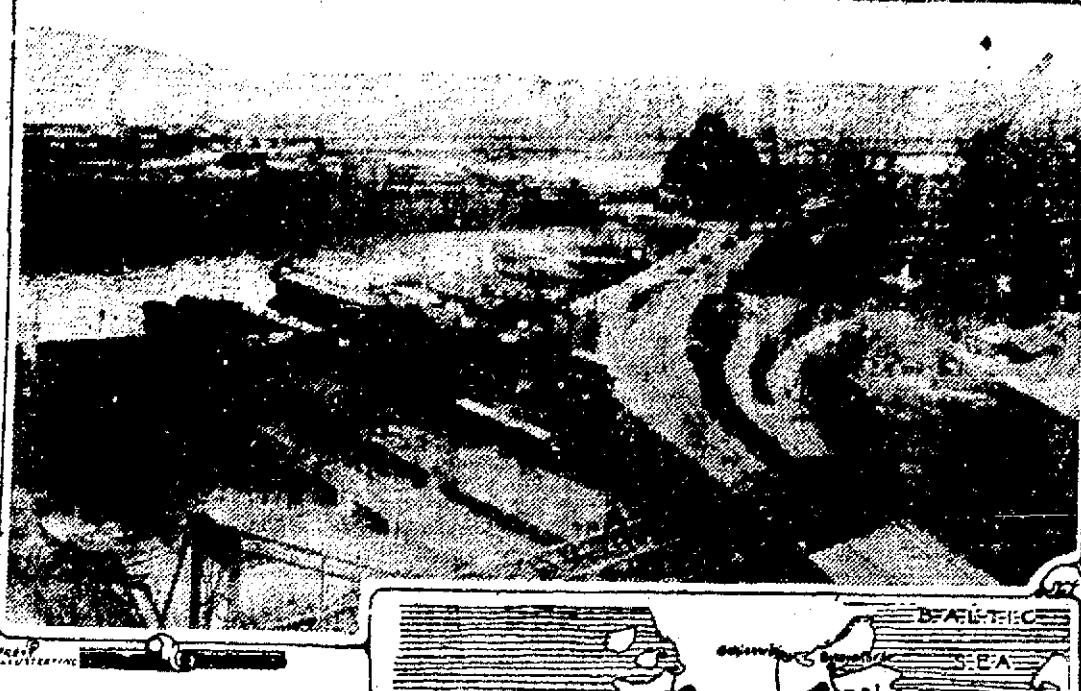

Gyp had talents.

He made such a showing at plain and fancy dog-vamping that Lively looking on, signed him for life contract. Shy strangers that fled at the very rumble of the dog patrol sidled up to Gyp for recognition. Hard-boiled outlaws that ranged the dark alleys liked Gyp's ways and were converted.

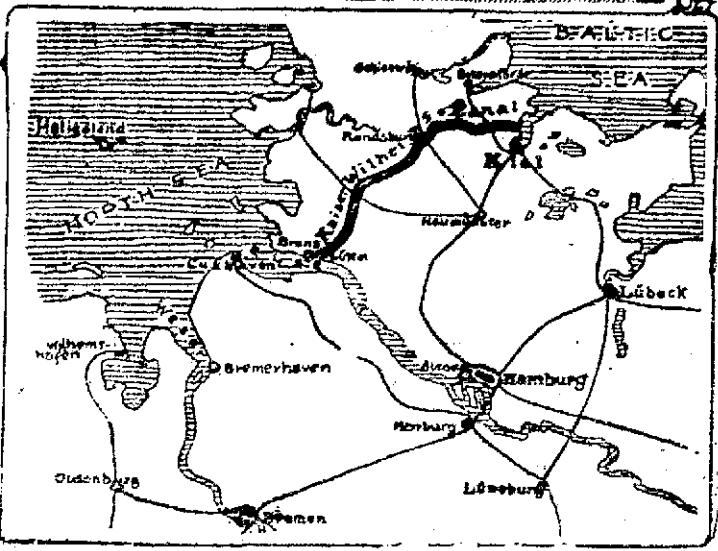

"I wouldn't take anything for that dog," quota Lively. "My business has nearly doubled since I found him. Doggondest dog I ever saw."

And Gyp certainly is a terrier.

## ORDER FOR WAGE VOTE FINISHED

Rail Union Heads Make Strong Plea Against Strike

CHICAGO.—(By Associated Press)

—The order for a nation-wide referendum by railway employees on the wage award of the federal labor board was completed Saturday with a strong plea against strike, at a meeting of the executives of the railroad brotherhoods, before they departed.

"The labor board," the order states "is the highest court of appeal in this controversy. No higher tribunal is created by the transportation act, and its decision must either be accepted or rejected without further negotiation.

"Altho the award was much less than the employees should have been awarded, and much less than they were entitled to, and altho they are, and have a right to be disappointed with the amount of increase in wages granted, more than 84 per cent of them have agreed thru their representatives to accept the award."

An appeal is made to the federated shop crafts, "which constitute not more than 22 per cent of the total employees of the railroads" to vote in support of the action of the majority.

The order recites the history of railroad wage disputes, beginning before the passage of the Adamson law.

The Chicago Yardsmen's Association, represented by 5,000 members, including 70 delegates selected to represent the various "outlaw" organizations of the country, voted unanimously to reject the railroad wage award because it "contained no provision for the seniority rights" for the men who struck last April.

"The strike could be settled in 48 hours if the roads would concede that one point," John Grunau, president of the association, said.

## DISORDER RULES IN MEXICO

Authorities Charged With Exploiting Laborers on Border.

MEXICO CITY.—Conditions on the northern border states of Mexico were characterized as immoral and disorderly by Roberto V. Pesqueira, financial agent for the Mexican government in the United States, in a statement he has just issued to the Mexican newspapers. Senior Pesqueira said the inscription which appears on signs posted along the roads leading to Tijuana, Lower California, "To Mexico—the road to hell" was accurate. For a few years no man had been able to work with security in Chihuahua and, he added, "in Juarez, as in Lower California, formerly there was enthrone in all its forms. One single example given would suffice to show the immorality it exists there. The gambling concession produced \$11,500 monthly to the government, and the same concessionaries today are offering to pay \$50,000 monthly for the same privileges."

Senior Pesqueira charged that Mexican laborers who crossed the line were being "villainously exploited" by labor agents, with the aid of the Mexican authorities. He likewise attacked the alleged practices of some American merchants who furnish office supplies to Mexican officials, of marking out invoices for double the right amount. "This fact shows the robbery that is being systematically committed against the national treasury and illustrates to what point official corruption has reached," Senior Pesqueira commented.

B. & O. ASKS COAL CARS BE RETURNED TO MINES QUICKLY

A special campaign is being waged by the Baltimore and Ohio railway to get coal cars returned to the mines as soon as possible after they are received in order to speed up the production of coal, it became known Saturday.

A communication received by the Lima Chamber of commerce from C. W. Galloway, vice-president of the Baltimore and Ohio, asks that all industries and coal dealers of the city be requested to make a special effort to unload cars on hand and return them Saturday and Sunday. By carrying out this plan on all divisions of the B. & O. it is thought coal production can be speeded up by many hundred carloads.

FORMER LIMA MAN DIES IN FT. WAYNE

Lima friends of Anthony Small, a former well known resident of this city, but for the past several years in Ft. Wayne, will be grieved to learn of his death which occurred Friday in Ft. Wayne, from a complication of diseases. While in Lima Mr. Small conducted a dry cleaning and pressing establishment.

The widow and two sons survived. They are Harry Small, secretary of the Morris Plan Bank, Cleveland; and Ralph Small, Toledo. Funeral services and burial Monday in Ft. Wayne.

WEATHER FOR WEEK

WASHINGTON.—Weather predictions for the week are:

Ohio Valley and Tennessee: Fair except probably showers about middle of the week. Temperatures averaging somewhat above normal.

Region of the Great Lakes: Showers probably Monday night or Tuesday in upper lake region and Tuesday or Wednesday in lower lake region; generally fair thereafter except showers toward end of the week in upper lake region; nearly normal temperatures.

A FAKE ADVERTISEMENT.

PEORIA, Ill.—Alleging Walter Wilson, prominent business man, refused to marry her as agreed, Mrs. Lena L. Steve filed a breach of promise suit asking \$10,000 damages. She charged Wilson with advertising for a wife and she answered. Their acquaintance ripened into love and, she alleges, Wilson proposed marriage on June 1 last. When the date arrived he declined to wed.

SPEEDER FINED

P. O. Micks, 19, laborer, 509 S. McElroy, was fined \$10 in criminal court Saturday morning after pleading guilty to speeding 30 miles an hour on a motorcycle on W. Elm st.

RING WATCHES THE LATES BERLIN.—It is no longer necessary to give a twist of the wrist to ascertain the time. In fact, it is now the mode to flip the finger with the advent of the ring-watch. Smart. Under the Linden Jewelry stores are exhibiting platinum, diamond set rings which at first glance appear to be merely rings but which on closer examination prove to have a small watch beneath the diamond cover of the ring.

Children Cry for Fletcher's Castoria.

Honest Advertising

THIS is a topic we all hear now-a-days because so many people are inclined to exaggerate. Yet has any physician told you that we claimed unreasonable remedial properties for Fletcher's Castoria? Just ask them. We won't answer it ourselves, we know what the answer will be.

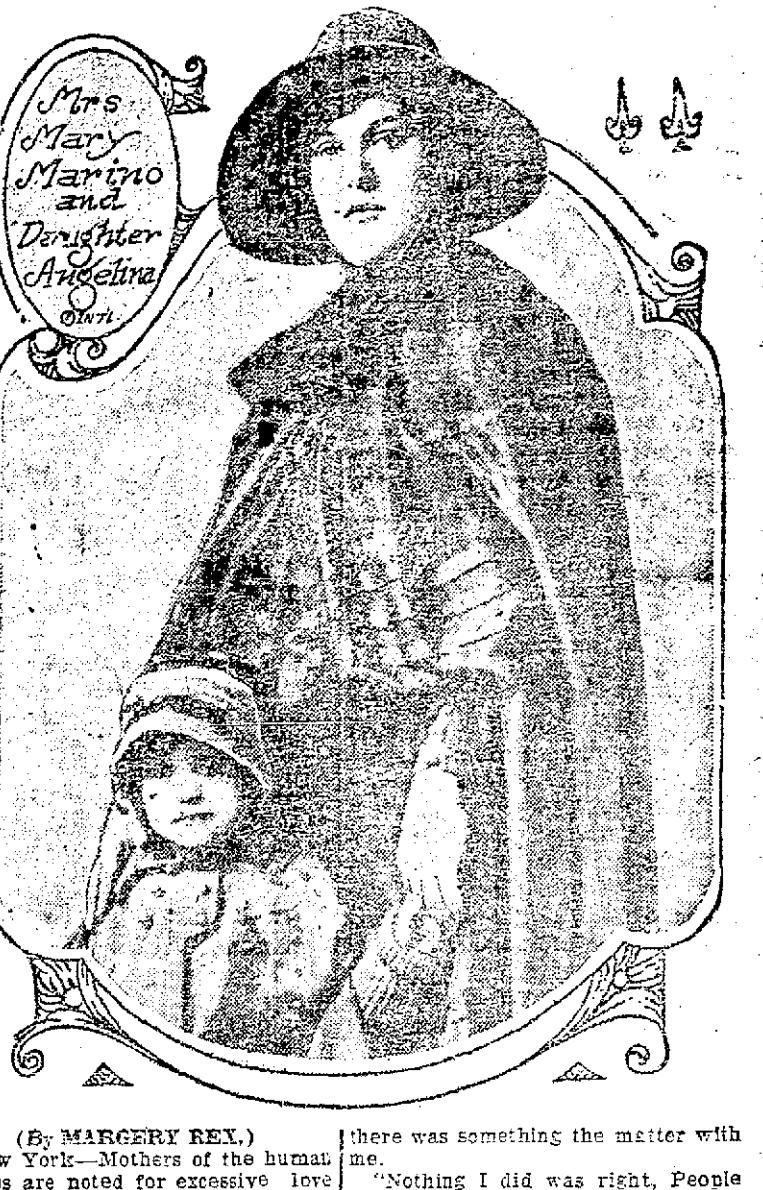

That it has all the virtues to-day that was claimed for it in its early days is to be found in increased use, the recommendation by prominent physicians, and our assurance that its standard will be maintained.

Imitations are to be found in some stores and only because of the Castoria that Mr. Fletcher created. But it is not the genuine Castoria that Mr. Fletcher Honestly advertised. Honestly placed before the public, and from which he Honestly expects to receive his reward.

Genuine Castoria always bears the signature of *Castor Fletcher*.

Children Cry for Fletcher's Castoria.

CENTRAL AVENUE AND  
SPRING ST.LIMA NEEDS MORE  
CIVIC PRIDE ON  
PART OF CITIZENSCity Is Destined For Greater Things  
If the Public Will Take Pride  
In It

TRAVEL where you will, from east to west, from north to south, in any state of the union, it is practically assured that one will arrive at the conclusion, after looking 'em all over critically and impartially, that Ohio is, after all is said and done, the best state in the union, in many respects.

And, likewise, after visiting the cities that have been built, large and small, in any state, one is also forced to the ultimate decision that Lima is one of the best, if indeed not the very best. There are other centers of population that can and do boast of wonderful civic pride. In many instances that is about all they have to base their horn tooting concert on. It isn't intended to convey the idea herein that there is no civic pride in Lima; far from it, but there is ample room for improvement.

Lima has much a multiplicity of advantages in most any line that can be suggested, its growth is steady and substantial, its institutions are well grounded and it is such a desirable place for the location of a business or the establishment of a home, that really there remains little to be desired. However, there is one thing that is needed — more general civic pride. Nothing appeals quite so much to visitors as clean streets, clean alleys, fences and walks in a good state of repair, home surroundings neat, with gardens and flowers, houses neatly painted, weeds kept down and a general air of scenic pride.

Lima compares favorably with most cities of its size in this respect, but it is so easy to make it stand out as a striking example of cleanliness and beauty that really there is no reason why it should not be so. Our people are taking advantage of the splendid parks afforded. They are being improved constantly. And in time other parks will be established. Just at this time the very best progressive step that Lima can take is to make assured the success of the bond issue to be submitted to the voters on August 10 for the construction of river retaining walls, to prevent the destruction of adjacent property by flood water, make assured that the city will keep its pact with property owners who gave land for the widening of the river channel and to enhance the river surroundings.

In addition to this, the construction of a sewer, simultaneously with the construction of the retaining wall of concrete, will take from the river the offensive sewage that has made the waterway a public nuisance and transforming it into the thing of a bather of nauseating stench, beauty it should be, with clear, inviting water, backed up by dams, so that instead of being the eyesore that it now is, the Ottawa river will be enabled to discard the oprobrium of being "affectionately" referred to as "Hawg Krick."

Lima is progressive in big things that cost large sums of money and great effort, but is neglecting some

BOOST  
LIMA

It is a city to be proud of. But every citizen must feel this pride and do his or her part toward making Lima a better place in which to live.

CONSISTENT EFFORT  
HAS BUILT UP  
BECKMAN ELECTRICLocal Concern Shows Result of Energy  
Plus Advertising

One of the most striking examples of a business which has been built up from a meager beginning into one of the big concerns of the city is that of the Beckman Electric Service Station which is now located in a brand new building of their own on South Central Avenue.

This concern has been built to its present stage through consistent effort and consistent advertising, both of which have shown results in the building in the new home for this electric service station.

The work which is done at this unusual shop is interesting in every detail and most interesting of all is the charging department where dead storage batteries are revived by "charging" and restored to life and sent from the shop in as good condition as when they were first new.

Although storage batteries are becoming more and more common in use as the advance of the automobile industry assets, itself, there are many who haven't the slightest idea of just what a storage battery is and what it does, let alone the why's and wherefore's of this invention.

A storage battery is simply a device for storing energy at one time for use at another. Energy is put into it in the form of electricity and delivered from it in the same form. The process of putting energy into the battery is termed "charging." When the battery is delivering energy, it is "discharging."

The action of a storage battery may therefore be described as a "restorable" battery; that is, a battery which by means of a charging current may be restored from a discharged to a charged condition.

A storage battery may therefore be described as a "restorable" battery; that is, a battery which by means of a charging current may be restored from a discharged to a charged condition.

The action of a storage battery may therefore be described as a "restorable" battery; that is, a battery which by means of a charging current may be restored from a discharged to a charged condition.

THE FAMILY PICNIC.

The first thing to do when organizing a family picnic is to select a day when it is reasonably certain that a large thunder cloud full of rain will chase all over the state looking for this picnic and then will finally settle down over it at 2 o'clock in the afternoon.

The next step is to invite thirty-seven relatives who do not speak to one another on account of old wills in the family. Then pick out a picnic ground that is five miles from the end of the trolley line over a dusty road.

Some people do not make a success of family picnics because they don't go at it right. They try to make everything come out right and to arrange a fool-proof picnic. As a result everything goes wrong and none of the relatives ever speaks to them again.

The thing to do is to arrange for the worst in every possible way, including the traveling arrangement, the food, the entertainment and the weather. Then, on account of the general stubbornness and perversity of picnics, something is liable to go right.

One of the best ways to arrange a family picnic is to carefully plan all details except the place. Invite all the various branches of the family, but do not tell them where the picnic is to be held.

Make them look around for themselves and then it is certain that every branch of the family will go to a different place without a riot and everybody will vote to have another one just like it next year.

There was once a kind-hearted man who got up a family picnic and paid all the expense himself. He hired automobile buses, called for everybody who was invited, took everybody to the picnic grounds, served a dinner prepared by a high-priced catering company, hired a symphony orchestra to play, and made every person present a gift of a gold watch or a diamond brooch.

It was a fine affair, but the relatives got so talking about him and about each other before the dinner was reached and ever since then he has been accused of every crime from carrying hooch to murdering Joe Elwell.

KINDLY ADD OUR NAMES.  
(From the *Chula Vista Star*.)

Ha-Ha—Joe Soper was unusually happy one day this week. We hear he popped the question and was accepted. Here's our best wishes.

Woman in business is not a new idea. Wasn't Cleopatra president of the Egyptian Home-making Company?

It is announced that the discourager of celluloid is dead. And if the movie industry doesn't build him a monument, there is no gratitude on earth.

On account of a strike of brewery employees, Berlin is almost without beer. A few months of that may completely ruin them.

Tomatoes for babies is the recommendation of a doctor, but for decorative purposes and making it seem like home, nothing will ever take the place of a stick of incense.

There are times when Mr. Ruth seems almost ruthless.

WHAT THE STARS PREDICT

This is an unlucky day. Business comes under an unfortunate rule, making for losses. Banking is particularly subject to the evil influence of the stars. Trouble with a foreign power indicated. Speculation in oil stocks will be most unfortunate under this rule. Persons whose birthday this is should avoid quarrels and law suits this year. Children born today will be clever and extremely active. (Copyright 1920) Columbus Dispatch.

IN LIMA CHURCHES SUNDAY

First Reformed church, T. W. Hoerner, pastor. Sunday school at 9 o'clock. Fred W. Zeits, superintendent. Morning worship and sermon 10:15 o'clock, sermon subject, "A Truth Seeker." Prayer service and Bible study Wednesday evening at 7:30 o'clock.

St. Paul Lutheran Mission, on St. John's Rd. Preaching at 8:30 o'clock. The pastor will begin a series of sermons on the general theme, "The Nature and Destination of Man as Taught by Revelation." Sunday sermon will be "The Double Nature of Man, Soul and Body."

The Second Baptist church, Rev. L. R. Mitchell, minister, 520 W. Spring st. Sunday school 9:30 a. m. in, W. A. Kaker, Supt. Morning worship 10:45 a. m., sermon by the pastor, subject, "And They Went to Hebron." Young People Meeting 6:45 p. m. Mrs. Daisy Woodward in charge. Evening worship 7:30 p. m., sermon by the pastor.

Central Church of Christ, W. North St. J. Allen Conby, minister. "The Ideal Home" will be the topic of the sermon at 10:30 a. m. Sunday.

ALLEN-CO CENSUS FIGURES

LONG delayed, but not over-anxiously anticipated, the census figures for 1920 for Allen-co have finally been announced. There was no anxiety, for the reason that since the population of Lima was announced several months ago it was assured that the county as a whole would show an increase in population, unless there should be an amazing and unexpected falling off in the number of people in the country, outside Lima.

The census bureau, perhaps for the purpose of making assured that it is right before announcing figures for any city, town or county, has been very deliberate and as a consequence there are many centers of population over the country whose inhabitants do not even now know just how strong they are numerically.

The census returns, announced for Allen-co, show that outside of Lima the gain in population for the entire county is less than one thousand, 834 to be exact, in the past ten years. The percentage of gain in Lima in the ten year period was 35.4 per cent, while for the county as a whole the gain is 20.5 per cent. At the rate Lima is growing, if the same percent of gain is maintained during the next ten years, and the county does not make a better showing than it did during the past decade, the city will have more than two-thirds of the entire population of the county. It is now only a few hundred short of that mark.

The trend of population is toward the cities, to the detriment of the farming districts and small cities and towns as a whole. Naturally, the people of the cities rejoice in their progress, but at the same time the people generally view with alarm the tendency away from the farms. Agriculture is the bulwark of the nation. Manufacturing enterprise is of course also essential, but it does not, cannot, perform equal service in assisting to feed the teeming millions.

CHRONIC DENOUNCERS

IN a convention recently held a speech was given which a newspaper man reported as a "denouncing bee." The speaker denounced the League of nations, war statesmanship, congress, the state legislature, Wall street, railroad ownership, the oil trust, big business, the press, the tax system, the beef trust, the privileged few, the profiteers, the reactionaries, the capitalists, the cement trust, the coal barons and numerous laws by name and author.

He didn't do anything else but denounce something or somebody. His time expired before he had completed his job of denouncing, or very likely he would have continued his tirade, until the sun lost itself from view beyond the western hills.

There is no doubt whatever but that the fellow had good grounds for denouncing some of the things he mentioned. Perhaps it would be better if all of us found a little fault occasionally, on our own "hook." However, it is a fact that when a man does nothing but denounce, there is something wrong with him. He is a chronic pest, probably suffering from liver complaint, or having had his chance, failed. Those who see nothing good in anybody or anything are out of order with the world and need a mental bath.

Denunciation is a poor argument for something better. Too many use it as a flattery method of getting publicity. The records do not show that it ever helped straightening out kinks. There is nothing to show that reforms were ever brought by chronic denouncers, neither is the world benefitted by the fault-finder.

Honest criticism, which offers a substitute—something better—for the thing it criticises, is a real benefactor. It helps the old world along to better and bigger things. We need honest critics, but denouncers, never!

ELECTION PREDICTIONS

THE most useless literature of the day is an election prediction, or a forecast of how the several states are going to vote this fall. The party leaders seem to think it is good business to make predictions, and it may be, politically. But the truth is that at this time there is no possible way of determining or forecasting how a state is going to vote this fall, for the simple reason that there are enough voters in nearly every state who do not know themselves how they are going to cast their ballots to change the results.

There are only a few states in the union whose voters are so set in their ways as to make it certain what the result will be this fall. Some of the Southern states are so thoroughly Democratic; some of the Northern states are equally certain to go Republican. But the vast majority of states are so nearly balanced between the two parties that they are likely to go one way or the other depending upon the state of mind that exists when November rolls around.

At this time the issues are not clearly drawn. The platforms have been adopted, it is true, but platforms do not mean a great deal. What the candidates say and do for the next two or three months will influence more voters than the platforms will affect. Later on party issues will crystallize, as it is expressed, and men and women will be more decided as to what they are going to do. So at this time the election prediction is just so much newspaper space wasted; it means no more than does an election bet, which is to say it means nothing at all—Columbus Dispatch.

present.

The First Baptist church, High and McDonald-sts. Rev. Franklin A. Stiles, minister. The usual morning services at this church Sunday beginning with the Sunday school at 9:15 followed by worship and sermon at 10:30, the subject will be, "Days Off With the Divine." There will be music by the orchestra and selections by the quartet.

St. Paul Lutheran church, North and Elizabeth-sts. Rev. John Keeley, pastor. 9:15 o'clock Sunday school, C. F. Sprague, superintendent. The Rev. J. W. Riogard, St. Luke's church, Philadelphia, and former pastor of the St. Paul church, will occupy the pulpit.

St. Paul A. M. E. church, W. Spring-st. J. A. Collins, pastor. Sunday school at 10:30 o'clock and 7:30 o'clock. Morning theme, "Love Covering Sin." Mid-week prayer services on Thursday evening at 7:30 o'clock. Teacher's meeting on Friday evening.

The First Congregational church, Elizabeth-st. near Market-st. Kyle Booth, pastor. Bible school at 9:15 a. m. Morning worship at 10:30 a. m., sermon subject, "The Church's One Foundation." Music by the children's chorus choir. This will be the last church service until the first Sunday in September and it is expected that every member will be

OXFORD'S COTERIE OF COMPOSERS

MARGARET BRANDENBURG

happily satisfying about them. They are almost a sacrifice compared with a crash the curtain falls.

Widdered, I looked about. The animals had disappeared; Alice, too, the longer I composed. My last song, "The Round Tower at Jhansi," is very orchestral in its effects. Like any other orchestral score, it loses by being performed on the piano. I am now working on a two piano number, a suite of three movements. The last movement is a polonaise, the middle movement a waltz. The first may have to be called an impromptu, although that isn't the exact word I want. I have been blocking out a musical drama for women's voices and orchestra with Alfred Noyes' poem, "The Words for it."

Mr. Towner's friends are most enthusiastic about his "To a Desert Mountain," which he wrote for Mr. Towner's birthday. It is probably connected with the music department of Oxford College, of which Mr. Towner is the head. They met while they were both studying music in Berlin.

Mr. Towner writes a great many songs, "Ecstasy," "My Dreams," and an especially beautiful sacred song, "Star of the East," are some of them. However, "The Round Tower at Jhansi," with the words of Christina Rossetti, is probably one of the most effective as well as the most dramatic of his compositions. It is written for orchestral effects.

When it was sung at Oxford College this spring, the College Orchestra played the accompaniment.

"Do you find that you are influenced by the ultra modern composers?" I asked Mr. Towner. "Well," he replied, "I do hope I am not old fogeyish. But I really cannot countenance long series of discords and unresolved harmonies. They do not express any emotion to me. They are nothing but suspended motion. There is nothing permanent about them."

The Short Cut

Every advertisement in this paper is a short-cut. Advertisements make it possible to tell you in a few minutes all you want to know about the service or articles you need.

At a glance you can sift what interests you most and in a moment you know just when and where to go for what you want.

Figure how many steps, how much needless walking and talking the advertisements thus save you and your neighbors.

Then you realize the great economy and necessity of advertising in your daily life.

## Babe Ruth May Be One of the Loudest Boosters the Game Has, But His Home Runs Make Him the Biggest Knocker

## WATCHING THE SCOREBOARD CHANGE

**FRIDAY'S HERO** — Babe Ruth the Colossus of swat. The Babe hit his 23rd homer and helped the Yanks give the Indians the third trimming in a row and hop into first place by a score of 6 to 3.

**Greasy Neals Triples** in the eighth inning and scored the run that beat the Giants 1 to 0. Roeter stopped the Giants at first base after the fourth inning.

**Art Fletcher** biffed a homer with two on in the ninth and clinched the game, the Phils beating the Cubs 10 to 7. Jim Vaughn was knocked out of the box.

**National League**  
New York at Cincinnati, Brooklyn at Pittsburgh, Philadelphia at Chicago, Boston at St. Louis.  
**American League**  
Chicago at Boston, Cleveland at New York, Detroit at Philadelphia, St. Louis at Washington.  
**American Association**  
Indianapolis at Columbus, Louisville at Toledo, Milwaukee at St. Paul, Minneapolis at St. Paul.  
**International League**  
Toronto at Akron (two games), Buffalo at Rochester (two games), Baltimore at Syracuse (two games), Jersey City at Reading (two games).

**Pick's Homer** helped the Braves beat the Cards 6 to 5.

**Bigbee's Wild Throw** in the ninth on top of two hits off Babe Adams, gave the Dodgers a pair of runs and beat the Pirates 6 to 5.

**Murphy's pinch hit** gave the White Sox two runs and they beat the Red Sox 8 to 7.

**Six hits in succession** sent Pennock to the showers.

NEW YORK.—The brief session of the stock market today was dull but firm in most essentials, events overnight inducing short covering. Cables offered hope of early settlement of the situation in Central Europe and this was reflected in the better tone of foreign exchange. The usual speculative favorites showed an early irregular advance, especially oils, steels and several of the high grade equipments. Later pressure against some of the secondary automobile issues, notably Maxwell and Hupp caused a setback in which gains were materially reduced. The closing was steady. Sales approximated to 175,000 shares.

## Short Shavings

A man who possesses a corpulent figure takes a Sunday school class. Recently he gave a lesson upon how this affected the future life.

"The fat would be in the fire," replied one lad, after some reflection.

A Frenchman, guest at a London hotel, had just been presented with his bill. The he paid it without formal protest, he was most indignant at its amount.

"I wish to see the proprietor!" he exclaimed to the clerk.

In a moment the proprietor entered.

The Frenchman was all smiles.

"Ah!" he exclaimed, "I must embrace you!"

"But why should you wish to embrace me, sir?" asked the astonished hotel keeper.

"I do not understand."

"Look at zees bill!"

"Yes, your receipted bill. What of it?"

"What of it? Simply zees, saire, when I die if I had led a bad life?"

It means zat I 'll nevaire, no in passing it."

We hear a lot about altering the divorce laws, but let us hope it won't be made as easy as it is in one American state, where a man went to consult a lawyer about his wife, says a London paper.

"I want to find out if I have grounds for divorce," he said.

"Are you married?" the lawyer asked.

"Why, yes, of course!" responded the client.

"Then you have grounds," the attorney said.

"Yes, I still have the first five dollar bill that I made," said the gray-haired ranger.

"Good gracious!" exclaimed his travelling acquaintance. "How did you keep it so long?"

"Well, it was very imperfect, being my first, and I'd have had trouble

in passing it."

"Well, boys," he asked, in conclusion, "what would happen to me if I die if I had led a bad life?"

"What of it? Simply zees, saire, when I die if I had led a bad life?"

It means zat I 'll nevaire, no in passing it."
